# Revvence

Capabilities Overview

About Us

Revvence is a specialised consultancy focusing on accelerating and enhancing the impact of finance transformation in the banking and financial services sectors.

Our core team, which has completed 100+ projects, mainly consists of ex-client-side professionals, former Big Four consultants, and Oracle specialists. They all possess a deep understanding of core banking processes.

Our Approach

- ✓ We exploit the full potential of AI, Machine Learning and Generative AI in the design and delivery of our solutions.

- ✓ We focus only on serving the banking and financial services industries.

- ✓ We specialise in connecting business stakeholders' needs with the full potential of available technology, process change, and data transformation solutions.

- ✓ We implement Oracle's core Financial Services solutions, the Enterprise Performance Management (EPM) suite, Data Platforms, and integrations with SAP, AWS and Microsoft.
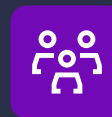

Strategic Modelling
Simulate and set financial targets at a P&L and Balance Sheet level.

Cost Planning & Allocations
Manage the full lifecycle of cost including, people, IT and projects.

Profitability
Understand the risk adjusted performance of clients and products.

Instrument-Level Ledger
Transform ledger performance, transparency and insights.

FP&A Automation
Streamline, automate and increase business value and insights.

Risk Transformation
Optimise risk analytics to optimise RWAs to increase return on equity.

Reg Reporting
Accelerate regulatory reporting such as ESG, CSRD and the financial close.

AI Solutions
Enable Oracle AI, ML, AI Agents and GenAI across finance processes.

- Climate & ESG Analytics
- Accounting Foundation
- Account Reconciliation
- Profitability & Balance Sheet Management
- Funds Transfer Pricing
- Asset Liability Management
- FlexCube

*Plus data integration and API development.

Portfolio Highlights

- Our team delivered modelling tools that enable a global bank's C-suite to model how changes to a wide array of MEV assumptions will impact liquidity risk and future dividends.

- We designed and implemented a workforce cost-planning solution that enabled a global bank to plan and model costs for 120,000 FTEs and integrated the solution with Workday.

- We delivered a cost allocation solution that allocated £9b a year in costs to increase front-to-back office transparency and control in how costs are allocated for P&L owners.

- Our team has delivered solutions for risk reporting, such as Loss Given Default, Impairments, Capital Adequacy, and RWAs. We have also delivered IFRS and Basel reporting solutions.

- We transformed profit analysis for a global bank in specialised areas, including producing a daily view of client-level profitability, loan portfolio modelling, and balance sheet sensitivity.

- We have developed a **ChatGPT application** based on the OpenAI 4.o model trained exclusively on Finance Transformation and Technology Change content. You can try it here.

Our team has worked for...

BARCLAYS   NatWest Group   HSBC   LLOYDS BANK
